Hydraulic systems and components for industrial applications

HYDAC

HYDAC

INDUSTRIE

A dedicated partner, one point of contact, nationwide coverage, and sustainable solutions

Optimise your production process without additional energy consumption. HYDAC offers hydraulic solutions that enhance the efficiency of your machines.

WE PROVIDE COMPONENTS, SYSTEMS, PIPING, SERVICE AND MODIFICATIONS FOR A WIDE RANGE OF INDUSTRIAL APPLICATIONS, INCLUDING:

- ✓ Metal processing
- ✓ Paper & pulp
- ✓ Food & beverage
- ✓ Energy sector
- ✓ Mechanical engineering
- ✓ Infrastructure

WE UNDERSTAND THAT EFFICIENT PRODUCTION IS CRUCIAL FOR STAYING COMPETITIVE.

HYDAC combines a broad product portfolio with over 50 years of experience in development and manufacturing, along with the expertise to solve even the most challenging problems.

HYDAC is a manufacturer of high-quality hydraulic components, with eight locations in the Netherlands. In many cases, we can supply components directly from stock. Our focus is always on you, our customer. From the early design stage, we can work with you to help make the right choices. Improving and modifying existing machines is also part of our expertise.

In addition, HYDAC provides condition monitoring systems that allow you to plan maintenance in advance and reduce costs. That's why HYDAC is always the right choice.

ustainability through long-lasting & cost-saving applications and solutions

Components

HYDAC develops, manufactures and supplies high-quality hydraulic components for the industrial market, with a strong focus on customer support through technical expertise and service. You have direct contact with HYDAC specialists who understand your challenges and know exactly what you need, ensuring you are fully supported at all times. That is what sets HYDAC apart from the rest.

Systems

From three production locations in the Netherlands, the Dutch market is served quickly and flexibly with hydraulic systems. Small-scale and series-built systems are supplied from Drachten. The Enschede location delivers diesel power packs and special projects, while large and complex turnkey projects are developed at the Apeldoorn facility.

Piping

HYDAC can realise complete piping projects, from engineering and installation to testing. Our centrally located facility in Apeldoorn is equipped with a state-of-the-art CNC pipe bending machine. HYDAC piping systems are prefabricated, delivered on site, installed, flushed and pressure tested.

Service

With our service team operating from six locations across the Netherlands, we are available 24/7 to keep your hydraulic installations up and running. Nationwide coverage and everything under one roof: commissioning, inspection, maintenance, overhaul and modification, calibration, oil analysis and condition monitoring.

Cylinder modification & repair

The specialised HYDAC team of cylinder experts handles all cylinder repairs and modifications quickly and efficiently from the service location in Apeldoorn. This team also coordinates all new-build requests for our modern production facility at HYDAC/HydroSaar in Germany.

Rental

Prefer renting instead of investing? Complete solutions, one supplier, one point of contact. A comprehensive fleet of hydraulic measuring and maintenance equipment is available to you, including dehydration systems, filter units, particle counters, measuring equipment and flushing containers. Proper maintenance reduces costs.

Industry 4.0

HYDAC offers a range of sensors and software that allow you to predict maintenance for your machines. This helps prevent unexpected production downtime and the associated costs.
