Hydraulic systems and components for offshore & offshore wind

WWW.HYDAC-OFFSHORE.COM

HYDAC

Hydraulic (sub)systems and components for seamless operations of offshore- and offshore wind applications

With decades of experience, we have perfected our expertise, ensuring our systems are tailored to meet your unique offshore needs.

Robust and Reliable

Our hydraulic systems boast innovative engineering, using our own brand components, taking key measures like conditioning monitoring, filtration and contamination control, guaranteeing seamless operations even in the toughest environments.

Custom Solutions

We understand that offshore projects are unique. Our professionals will work closely with you to tailor hydraulic systems that align perfectly with your specific requirements. That is also why HYDAC is frequently involved in in-depth discussions with its clients in the (pre)design phase.

Unmatched Support

Our commitment to you extends beyond the commissioning phase. HYDAC provides reliable after-sales support and maintenance services, ensuring your hydraulic systems remain in peak condition for years to come.

Drive- & control systems

Jacket lifting tools

Heave Compensation
Saving up to 85%
energy consumption

Monopile handling systems

Cable handling systems
laying and burial

Monopile seafastening & upending

Piling & drilling templates

Monopile grippers

Offshore Access Systems
for passive and active
heave versions

Jones act compliant owf solutions

Offshore mooring feeder vessels

Motion compensating platforms
